

Welcome to the Innovatis Group Leadership Development Training Series!

We at the Corporate Learning Institute are excited to be joining you for your upcoming training series! We want to ensure that you have a handle on the program, and all the program resources available to you throughout the program.

- The program is a series of 6, 75-minute online training sessions designed to build your leadership skills and abilities.
- You will be joining a small learning team of peers to connect with throughout the program.
- The sessions are scheduled bi-weekly. In between training sessions, you will be joining your learning team online to tackle case studies, complete short assessments, or build actionable steps to build your leadership impact.
- To support the program, we have created a dedicated learning site loaded with additional readings and resources at <https://www.corplearning.com/innovatis/>.
- Several assessments will be offered during the program -The DISC Professional Styles Assessment and a short form Emotional Intelligence assessment. While we launch the program, we are also offering the DISC Professional Styles Assessment to all employees at the Innovatis Group through a self-managed approach. The information for that program is also located on your learning site.

We hope you enjoy and benefit from the program, the new relationships you will form as a learning team member and the skills and insights you will acquire.
